## parameters

holds parameters such as user location, current kwh per bytes  
(in the specified country).

### selectedRegion

region selected by user.

### regions

collection of region and  
infos on it.

france

carbon intensity

china

carbon intensity

### lastRefresh

the last time that carbon  
intensities have been  
updated.

## pref

general preferences for user :  
eg

auto refresh,  
refresh ms,  
daemon refresh speed  
daemon download refresh speed  
selected region,  
refresh carbon interval  
min ms between two data update  
remove animation  
show debug info
